

**Hack
Club**

hackclub.com

A global nonprofit that helps high schoolers everywhere start coding clubs.

Start a **Hack Club** at your high school.

What is a Hack Club?

Hack Clubs are student-led coding clubs where students learn to code by building self-directed projects. Hack Clubs are free to run, beginner-friendly, and built to ignite interest in STEM. It's like a mini-hackathon every week after-school.

Clubs from our community have gone on to host multi-hundred person events, run outreach programs at local middle schools, and build projects with tens of thousands of users.

There's no substitute for hands-on experience, and for most students the best way to gain experience is to start building projects. Hack Clubs bring a community together around just that.
